SUMMARY

Backend developer with 6 years of professional experience specializing in Python and Django. Proven track record in building scalable REST APIs, managing PostgreSQL databases, and deploying containerized applications using Docker and Kubernetes on AWS infrastructure.

EXPERIENCE

Senior Backend Developer

TechCorp, Paris — January 2021 – Present (3 years)

- Developed and maintained REST APIs using Python (6 years total) and Django REST Framework (3 years)
- Designed and optimized PostgreSQL databases, writing complex queries and migrations (6 years total)
- Containerized microservices using Docker (3 years) and orchestrated with Kubernetes (3 years)
- Implemented caching strategies with Redis (3 years) and async task queues using Celery (3 years)
- Managed AWS infrastructure including EC2, S3, and RDS (3 years)
- Maintained CI/CD pipelines using Git, GitHub Actions, and Jenkins

Backend Developer

StartupXYZ, Lyon — March 2018 – December 2020 (2 years 9 months)

- Built backend services using Python and FastAPI (2 years 9 months)
- Designed PostgreSQL and MongoDB schemas for high-traffic applications
- Wrote unit and integration tests using Pytest (2 years)
- Used Git for version control and collaborated on CI/CD pipelines (5 years total)

Junior Developer

WebAgency, Marseille — June 2017 – February 2018 (8 months)

- Built web interfaces using JavaScript (1 year total) and React (8 months)
- Assisted in Python scripting and automation tasks
